# TURBOSTATS™

*Basketball Edition* for Windows 98, ME, 2000, NT, XP

The Fastest, Easiest Way To Keep Stats

If you coach a basketball team, run a basketball tournament or league then TurboStats was created for you. Enter game data in minutes after the game or track stats during the game in live game scoring mode. Using our new ScoreKeeper software<sup>1</sup> on your Palm OS handheld computer you can track game stats courtside for both teams and import all statistics and shot charts after the game. Stats can be broken down by any period and you can create player, team and game reports and shot chart diagrams. Report by conference, non conference and other game types. TurboStats can even update most websites automatically with HTML output. No other stat tracking system can match it. Used by thousands of College, High School and Youth teams.

## Two Great Programs that Work Together or Standalone

"Dear Turbostats, When Murray Dennis from Trenton High School joined the basketball coaching staff at Cameron High School, he brought the Turbostats program with him. After using it, I would like to thank you for your work on the program. No other stats program I've seen has the versatility of Turbostats, allowing our team to customize the program with user-defined stats, customized headings on print-outs, and configurable stat sheet layouts. I look forward to using it much more in the future." - Sincerely, Gary Cameron Dragons Boys Basketball Program - Cameron High School, Cameron, MO
